

**AMENDMENTS TO THE SPECIFICATION:**

Please amend the indicated paragraphs of the specification in accordance with the amendments indicated below.

Pages 15-16: paragraph bridging pages 15 and 16, amend as indicated below:

A reagent disk (not shown) is located adjacent to the reaction disk 1. A dispensing probe 10 (refer to Fig. 4) reciprocates between the reagent disk and the reaction disk 1 to supply the reagent to the reaction cell 3. At that time, the reaction cell 3 is arranged to be transferred to a place where dispensing can be performed by dispensing probe 10 via a motor 18 when actuated.
